## About us

Nordic Sport is one of the world's leading suppliers of athletics equipment since 1972. Our constant company development include the ambition to become an even bigger player in soccer and ice hockey equipment.

We know sports from scratch. Nordic Sport rests on a proud tradition and we have always put quality first. For decades, the company has established itself as a reliable supplier in a global market. We are more wellknown in the international market than in regional and national.

Quality, loyalty and support are the core values that characterise our work and represent our brand. We are down to earth and easy to work with. Our origin and our values make us a natural partner that keeps its promises. Nordic Sport spirit means that we are proud of where we come from and know that we always want to deliver at a highlevel, while we put a value in being close to the customer and to be compliant to requests.

We are a family company with loyal employees, our products are affordable and of high quality. Our care for the small details create a strong brand. It is no coincidence that Nordic Sport is so frequently seen on the largest Athletics championships worldwide. Experience has taught the organizers that it pays to turn to us as a supplier.

The lessons of yesterday, we use today to make things even better tomorrow. It is called development and is one of our most important guiding principles.
